Research Interest

Database Storage Management, LSM-trees

Education

University of California, Irvine, CA — *Sept. 2016–Dec. 2020*
Ph.D. in Computer Science. Supervisor: Michael J. Carey — GPA: 4.00/4.00
Thesis: On Optimizing LSM-based Storage for Big Data Management Systems

Tsinghua University, China — *Sept. 2013–July 2016*
M.Eng. in Software Engineering — GPA: 94.1/100 (2 out of 136)

Tongji University, China — *Sept. 2009–July 2013*
B.Eng. in Software Engineering — GPA: 4.72/5 (2 out of 169)

Research Experience

Efficient Maintenance and Exploitation of LSM-based auxiliary structures [PVLDB 2019]

- Designed efficient point lookup methods to improve the applicability of LSM-based secondary indexes
- Proposed new maintenance strategies for LSM-based secondary indexes and range filters that substantially improved ingestion performance

Minimizing LSM-tree's Write Stalls via Novel Merge Scheduling [PVLDB 2019]

- Proposed a two-phase evaluation approach to evaluate write stalls of various LSM-tree designs
- Designed a novel greedy merge scheduler to minimize write stalls of LSM-trees
- Key insight is that LSM-trees can achieve both high write throughput and low percentile latencies

Adaptive Memory Management for LSM-trees [PVLDB 2020]

- Proposed a new LSM memory management architecture, including a new memory component structure, novel flush policies, and a memory tuner, for adaptive memory management
- Extensive experiments on YCSB and TPC-C benchmarks demonstrated the effectiveness of the proposed techniques in reducing I/O costs

Internship Experience

Research Intern, Microsoft Research, Redmond — *June 2019–Sep. 2019*

- Mentor: David Lomet
- Built a customized SSD controller to support batched writes and variable-size pages **[ICDE 2021]**
- Collaborated with David Lomet on designing and optimizing a novel cleaning algorithm for log-structured stores that substantially reduced cleaning overheads

Research Intern, IBM Almaden Research Center — *June 2017–Sep. 2017*

- Mentor: Pinar Tozun, Yuanyuan Tian
- Designed and implemented a unified multi-zone indexing method for evolving data in HTAP systems **[EDBT 2019]**

Software Developer Intern, eBay China Development Center — *July 2012–Mar. 2013*

- Participated in the development of eBay's web application framework
- Redeveloped the internal web traffic analytics system with MapReduce
