Research Interest

LSM-based Storage Management in Database Systems

Education

University of California, Irvine, CA   *Sept. 2016–Present*
Ph.D. in Computer Science, Specialized in Database Systems
Supervisor: Prof. Michael J. Carey, GPA: 4.00/4.00

Tsinghua University, China   *Sept. 2013–July 2016*
M.Eng. in Software Engineering
GPA: 94.1/100, Ranking: 2 out of 136

Tongji University, China   *Sept. 2009–July 2013*
B.Eng. in Software Engineering
GPA: 4.72/5, Ranking: 2 out of 169

Research Experience

LSM-based Storage Management in AsterixDB, University of California, Irvine   *Sep. 2017–Present*
o Designed efficient point lookup methods to improve the applicability of LSM-based secondary indexes
o Proposed new maintenance strategies for LSM-based auxiliary structures for efficient data ingestion
  and query processing
o Investigating flow control mechanisms to minimize stalls and variances in LSM-based storage engines

Indexing in HTAP Systems, IBM Almaden Research Center   *June 2017–Sep. 2017*
o Designed and implemented an indexing method for Hybrid Transactional/Analytical Processing
  (HTAP) systems, which
  - Unifies multi-zone data organization in HTAP systems
  - Supports multi-version timestamped queries for MVCC schemes
  - Performs non-blocking index maintenance to achieve maximum query concurrency

PSpec-SQL, Tsinghua University   *July 2014–Dec. 2015*
o Built a privacy-integrated data analytics system on top of Spark-SQL, which:
  - Provides a high-level privacy language for specifying privacy policies
  - Enforces privacy compliances against submitted queries using program analysis techniques
  - Integrates with differential privacy to offer provable privacy guarantees

Large-Scale Software Model Inference, Tsinghua University   *Mar. 2014–July 2014*
o Proposed a MapReduce-based approach for inferring software models from large logs
o Demonstrated efficiency and scalability with extensive experiments on AWS cloud

Work Experience

Research Summer Intern, IBM Almaden Research Center   *June 2017–Sep. 2017*
o Work on indexing in Hybrid Transaction/Analytical Processing (HTAP) systems

Committer, Apache AsterixDB   *May 2017–Present*
o Committer of Apache AsterixDB open source project

Software Developer Intern, eBay China Development Center   *July 2012–Mar. 2013*
o Participated in the development of eBay's web application framework
o Redeveloped the internal web traffic analytics system with MapReduce

Teaching Assistant

o Priciples of Data Management, University of California, Irvine   *Fall 2017/2018*
o Data Sturctures, University of California, Irvine   *Winter 2018*
o Projects in Databases and Web Applications, University of California, Irvine   *Winter/Spring 2017*

Honors & Awards

o Graduate with Honor of Beijing, Tsinghua University (top 5%)   *2016*
o First Class Scholarship, Tsinghua University (top 10%)   *2014, 2015*
o Graduate with Honor of Shanghai, Tongji University (top 5%)   *2013*
o Outstanding Student, Tongji University (top 5%)   *2010, 2011*
o First Class Scholarship, Tongji University (top 5%)   *2011*

Technical Skills

o **Programming Languages**: Java, C/C++, Scala, Python, SQL, R, Bash

o **Databases and Systems**: MySQL, Hadoop, Spark, Spark-SQL, Hive

o **Software Tools**: Eclipse, LaTex, Visual Studio, Matlab
